The class isn't a very big group so it's pretty good. The teachers are have clear explanations when it comes to explaining concepts also. The study notes and worksheet that was shared was very useful. The principal is very encouraging and the admin is also very helpful. So I would recommend going here if you are looking to take private olevels.

I love the teachers here! They make things really easy to understand and the class size is not as big so I'm able to sound out my queries! I had an enjoyable time there and my grades were excellent! When I was in public school my average score were mediocre at c5/b4 but my grades went up to A1 as I studied in smartlab! I highly recommend this place for private schooling!

SmartLab has been of tremendous help preparing my son for the GCE A level exam - with very organized tutoring and mock exams. Let's hope the student and SmartLab both a great success!

This marks my second registration in SmartLab, and I am pleased to note that the school has upheld its high standard of education. My son has shown significant improvement since his 2022 O Level results. Mr. Tony has been exceptionally dedicated, consistently checking in on my son's progress and providing encouragement. The team of educators has also demonstrated equal dedication and patience. Thank you!

As a private student doing A-levels in 2024 with the BCME (Biology, Chemistry, Maths, Economics) combination, my experience at SmartLab has been excellent. The teachers are highly knowledgeable and dedicated, providing clear explanations across all subjects.

Biology lessons are well-structured, and the teacher ensures that complex concepts are easily understood. Chemistry is taught with great clarity, making even the most challenging topics more approachable. The Maths lessons are equally well-organised, with personalised support whenever I need help to grasp difficult topics. In Economics, the lessons are engaging and cover all key concepts thoroughly, helping me develop a strong understanding of the subject.

SmartLab also offers valuable resources like past year papers for exam practice and a dedicated study room for quiet, focused revision. The teachers are always available for extra help, and the well-planned lessons ensure I'm prepared for my exams.

One of the standout features is the ability to message teachers with any questions I have, and I always receive prompt and helpful responses. Overall, SmartLab has provided the perfect environment for success in my A-levels, and I would highly recommend it to anyone looking for a supportive and effective learning environment.

A level student joined SmartLab Private School after completing J1 in Junior College. She previously took H2 Chem, and would be switching to H1 Chem.

oh uh I scored badly for Economics, I got a D for it but I expected it since I have been scoring poorly for Econ throughout the year. For Math and GP, I got A. For Physics and Chem, I got B.

12:35 pm

It is not the best, but overall I am happy with my results

12:36 pm

Definitely can do better but proud of what u had attained!!!!

12:36 pm ✓✓

Any course in mind

Came here for tuition as a private candidate for A levels. Was really difficult to find a good place for learning under covid circumstances but i'm glad i chose smartlab. Teachers are dedicated and genuinely want to help you. Notes provided are concise and detailed with practise questions and answers. Came here for chemistry and maths tuition specifically. My tutors Mr Tony Tan and Mr Tay were extremely helpful and explained questions in detail to make sure you're clear of the understanding. I especially like their method of teaching, although it being in a group setting, teachers take time to teach students individually at their own pace so no one gets left out. Despite having to take lessons online towards the end, they put in effort to make the lessons productive. Teachers were very proactive when it came to providing notes as well, always checking to make sure knowledge gaps were filled. They even provide science practical setups for practises, especially beneficial for private candidates like me who do not have a school to practice at. Overall would recommend this place to others looking for A level or other tuition! Prices are reasonable especially with such dedicated teachers and teaching style makes sure you stay on par with your work.

As a private candidate (who didn't have a lot of money to experiment with different places), I chose SmartLab initially out of pure luck and I can honestly say, I would never have gotten even close to a legitimate attempt at the A's if not for Mr Tony Tan (my chem tutor) and the staff there. Mr Tan embodies everything it means to be a teacher, and is by far the most genuine and passionate teacher I've seen in a long time, rivalled only by my favourite teachers from secondary school. I had virtually no proper science background, but he was always very patient and thorough with teaching me— even in the face of the new syllabus for the 2017 A's. Even up till the very night before, he gave me the confidence that I could do well for the A's, and I am immensely grateful for all his effort (often afterhours) and dedication. This review doesn't do justice to how much help I got at SmartLab. Thank you! :)
